Sharpdesk 3.3 Installation & Configuration

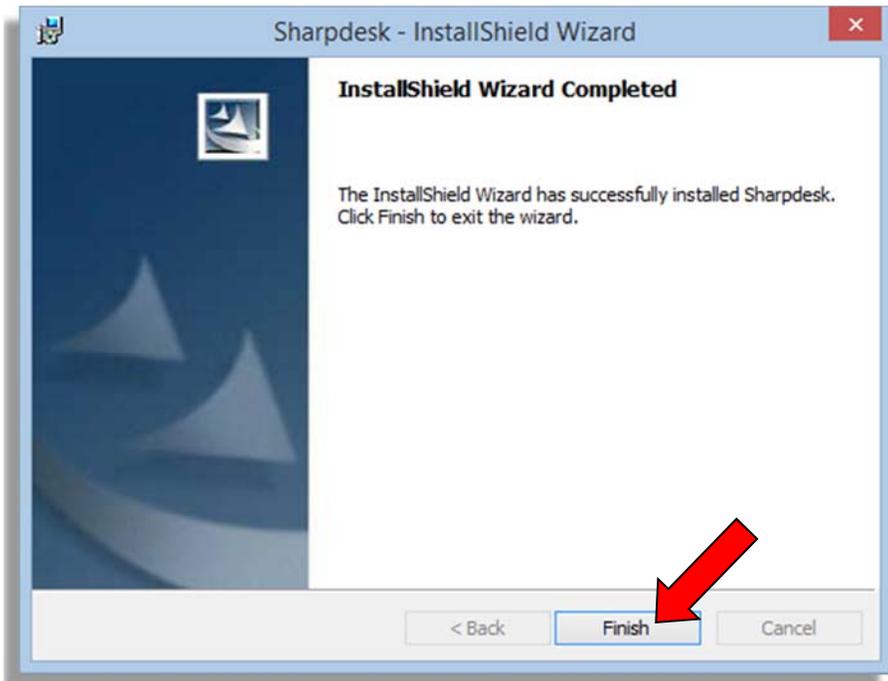

For Windows XP, Vista, 7 & 8 (32 and 64 bit)

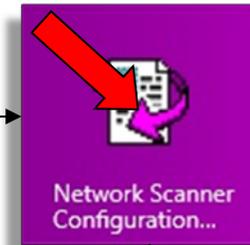

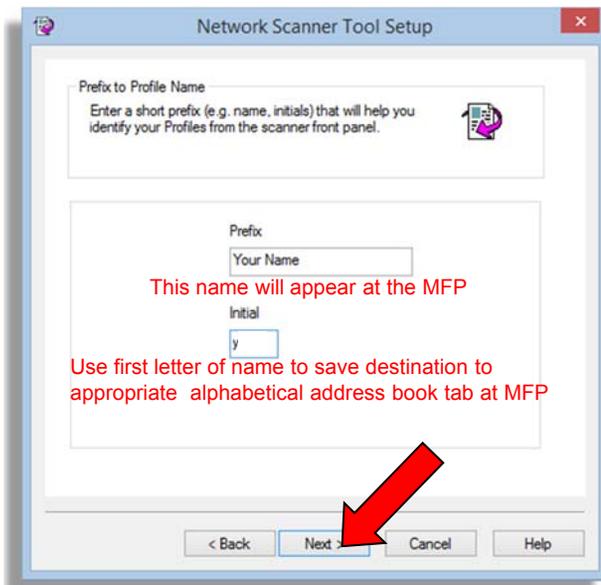

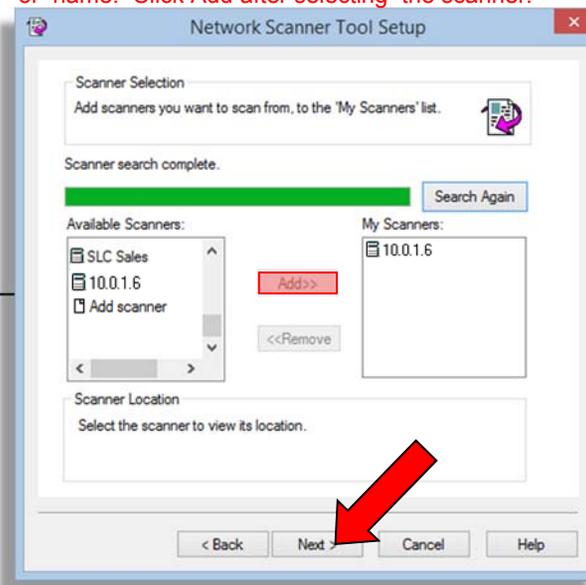

Select the Network Scanner Configuration Tool
(In All Programs)

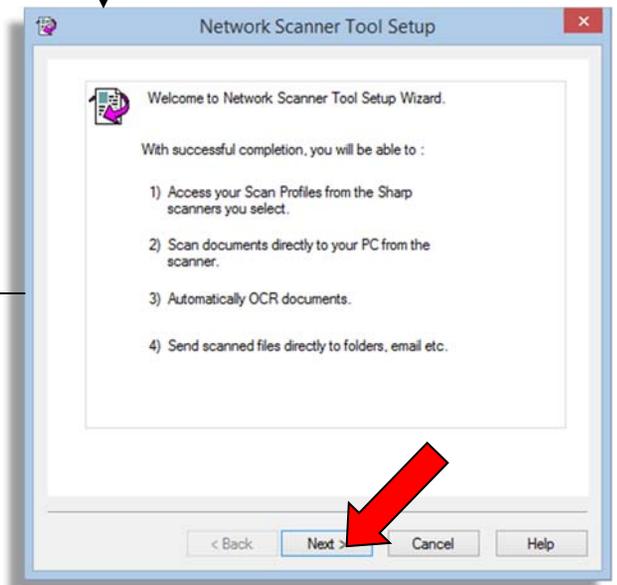

If you have trouble finding the NSCT see page 7 (Exhibit A)

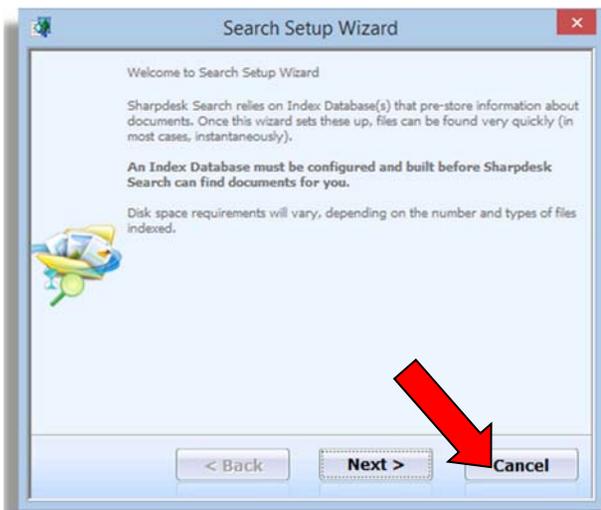

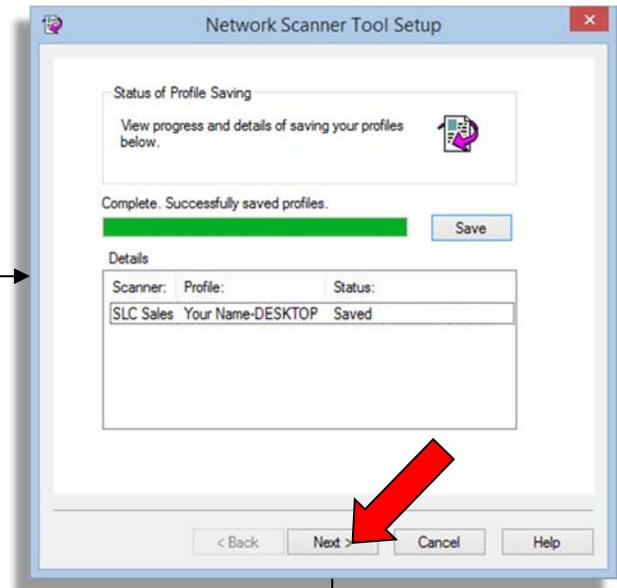

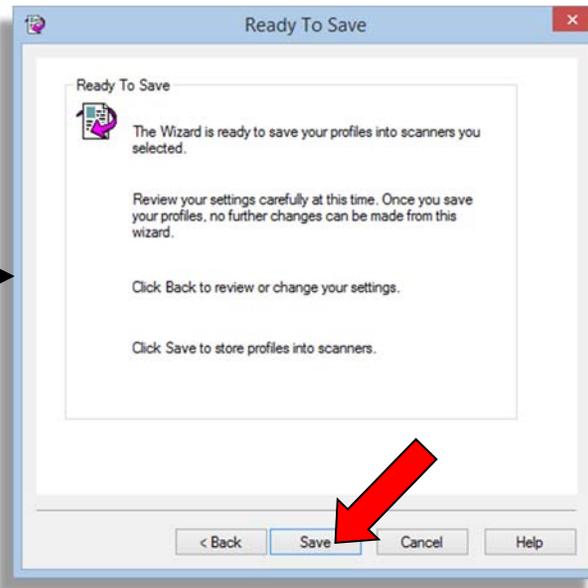

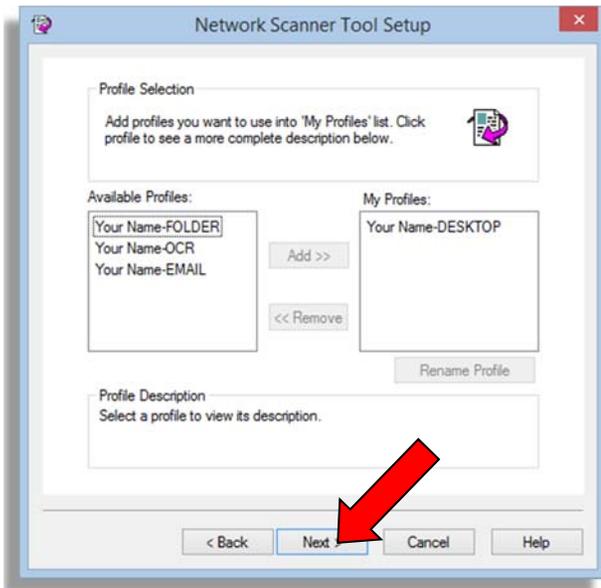

One or more scanners may show up as an IP address or name. Click Add after selecting the scanner.

If you have trouble adding a scanner, see page 7 (Exhibit B)

Click Sharpdesk
(On Desktop)

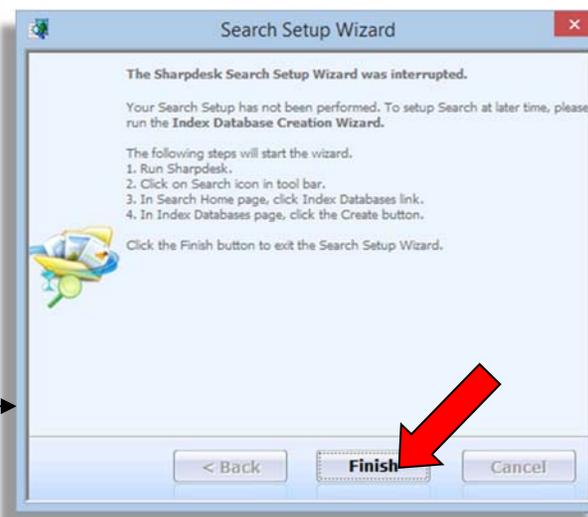

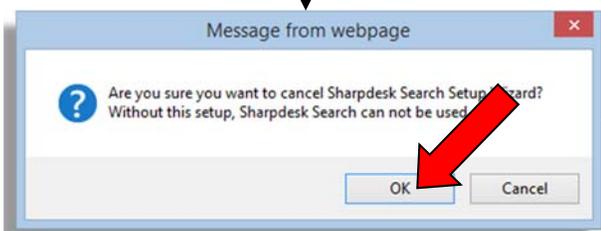

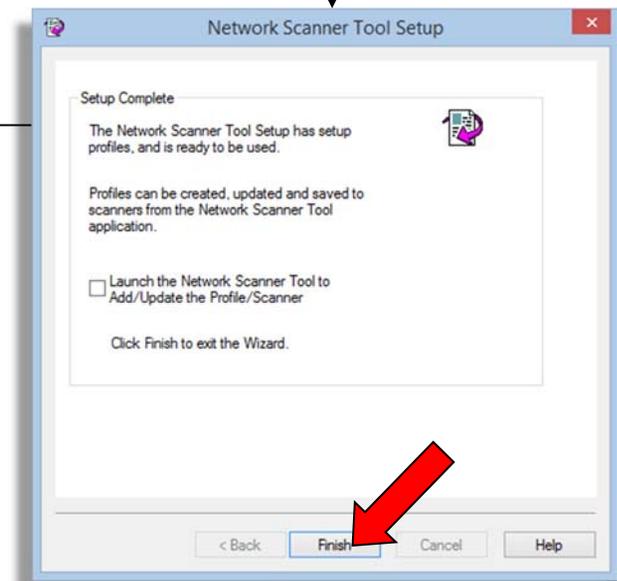

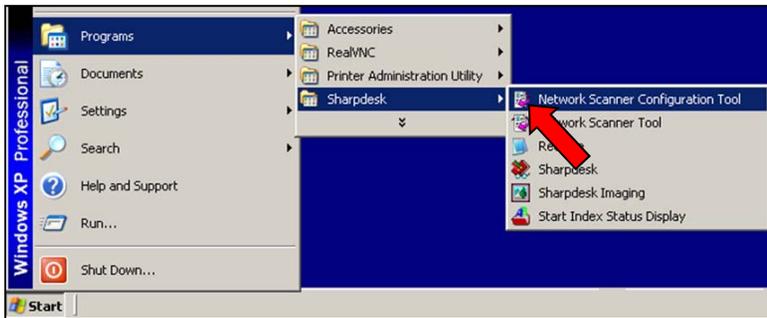

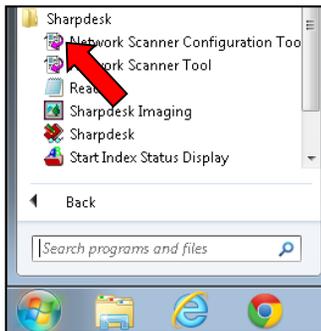

Exhibit A

XP: Start > Programs > Sharpdesk > Network Scanner Configuration Tool.

Win7: Start > All Programs > Sharpdesk > Network Scanner Configuration Tool.

Win8: Start > Begin typing “Network” (Search Field will appear). Click the Network Scanner Configuration Tool.

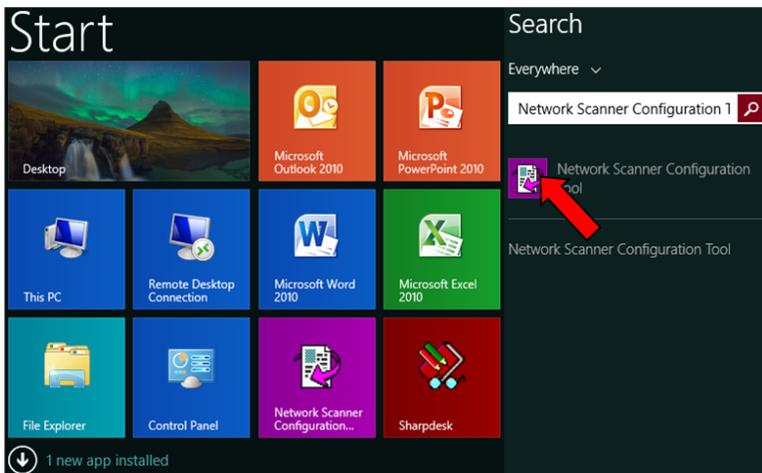

Exhibit B

- A. If no scanner is found, double-click “Add scanner”.
- B. Enter the IP address of your Sharp. Click Ok.
