

Configuring Sharp MX Series MFPs to Scan to Network Folders

August 21 , 2009

This tutorial shows how to setup and share folders in Microsoft Windows with proper rights/permissions and how to setup the destination folders using the built-in web interface of the Sharp MFP. Scan to Network Folder is only supported on MX series (not AR series). If you have an AR series model, it is recommended to setup [Scan to FTP](#). [You will need to know the IP address of your Sharp MFP](#).

See the [SMB_Newer_Interface](#) PDF below for the most common MFP web style interface.

See the [SMB_Older_Interface](#) PDF below for the following models: MX-M350N, MX-M450N, MX-M550N, MX-M620N, MX-M700N
